

Speakers

Ms Eveline Silva

Ms Eveline is a Psychologist with National Neuroscience Institute.

She does assessments & interventions for patients with cognitive complaints as a result of neurological issues.

She also runs the support group as part of the team for patients with dementia & their caregivers, interacting with family members & paid caregivers too.

Facilitator

Ms Li Wei is an Advanced Practice Nurse with National Neuroscience Institute at Tan Tock Seng campus. She graduated from National University of Singapore with a master degree in Adult Care Nursing.

She sub-specialises in Parkinson disease and movement disorder and has many years of experience in managing patients with Parkinson disease including deep brain stimulation. She is also a qualified advanced care planning facilitator.

Programme Highlights

SESSION 1

Parkinson disease is a movement disorder that is progressively degenerating. The various symptoms that include movement, communication, swallowing difficulties & cognition call for close attention to be provided to the patient.

However, the caregiver is also impacted by these symptoms. But often the caregiver is overlooked as the focus is on patient with PD. In this talk, we would like to redirect some attention back to the caregiver who is the pillar of support for these patients & their needs and wants should not be neglected in the process of caring for their charges.

SESSION 2

Caregiver experience sharing and discussion

This is the platform for caregivers to discuss the difficulties and problems they have encountered while caring for people with Parkinson disease (PwP). Caregivers can also share among themselves the useful and helpful tips for taking care of PwP

Date

30 September 2017 (Saturday)

Time
