

# Deep Brain Stimulation Support Group

Deep Brain Stimulation (DBS) is the implantation of electrodes into the brain to control symptoms of Parkinson's Disease and other movement disorders.

The support group aims to bring together, empower and support people who are considering DBS and those with DBS. Their families will be able to share their experiences and coping strategies on living with DBS through DBS support group.

**Venue: SGH Learning Space (Block 6 Level 1)**

**Time: 11am to 12.30pm**
